

TheraPlate Peak Performance Award Winners Amy Lamberth and Amadeo III Sweep Andalusian and Lusitano Horse Association National Championships

Weatherford, Texas (November 6, 2018) - For 15-year-old Junior exhibitor Amy Lamberth of Georgetown, TX, winning big is all in a day's work. Showing Twila Godinez's Amadeo III, at the USEF-sanctioned International Andalusian & Lusitano Horse Association Nationals, October 9-13 at the Great Southwest Equestrian Center in Katy, TX, Lamberth swept seven National titles, two reserve National Championships in P.R.E. Stallions 7 & Over and P.R.E. Functionality, and clinched the TheraPlate Peak Performance Award.

Remarkably, it was the teen equestrienne's first time showing a stallion and only her third time riding the horse. Amadeo III is a 10-year-old son of the great Elite P.R.E. Pure Spanish Andalusian champion, Impaciente II, and trained by Nicole Hill of Suspension Sporthorses LLC in Conroe, TX.

"I'd only ridden him twice before our first class and have never shown a stallion before. He's an incredible horse, with a great mind, and I think we made a great team," said Amy, who hopes to ride the newly-pinned AL Dressage Hack Open, AL Dressage Hack Amateur and AL Dressage Suitability Amateur National Champion down the center line to X at more dressage shows in the future.

Testimony to her own TheraPlate Award-winning talent and the stallion's outstanding versatility, the pair also had victory gallops in AL Country English Pleasure Junior Exhibitor, AL & Half AL Saddle Seat Equitation Junior Exhibitor, English Show Hack Open, and AL English Pleasure Hunt Seat Amateur and AL English Pleasure Hunt Seat 17 & Under.

Amy also competes on hunter/jumper and Appaloosa breed circuits, and spoke glowingly of Amadeo III's truly peak conditioning and athleticism: "He is amazing. I deeply appreciate the support I had from my team at Nationals. Not only from Twila and her wonderful horse, but from my family, too."

In addition to the TherPlate Peak Performance Award, Amy and Amadeo III have won a three-week trial use of a TheraPlate Revolution Therapy Plate. No stranger to the benefits of TheraPlate Revolution Therapy Platforms, (the Official Therapy Plate of US Equestrian teams) the Lamberth family has used its low-intensity dynamic movement to increase circulation and muscle response in their own purebred Appaloosa show horses.

The platforms are beneficial for horses (and humans) and reduce inflammation and pain while simultaneously increasing circulation to encourage a quicker healing process. For more information about TheraPlate Revolution Therapy Platforms visit www.theraplate.com, call toll-free (800) 920-3685 or (817) 629-5171.
